Deepak Gupta

Mern Stack Developer

+919376072436 ♦ deepakgupta9376@gmail.com ♦ Jaipur, Rajasthan, India ♦ LinkedIn ♦ GitHub

SUMMARY

Aspiring full-stack web developer with a solid foundation in HTML, CSS, and JavaScript, currently focused on mastering the MERN stack (MongoDB, Express.js, React.js, Node.js). Experienced in building responsive, user-friendly front-end applications and eager to apply back-end skills in real-world projects. Committed to writing clean, maintainable code and continuously improving through hands-on learning and collaboration. Looking to contribute to meaningful projects and grow into a full-stack development role.

• JavaScript, HackerRank Mar '25

PROJECTS

Car Rental full stack project Link

Jun '25 — Jun '25

jaipur, India

• Car Rental Web Application

Tech Stack: HTML, Tailwind CSS, JavaScript, React.js, Node.js, MongoDB

Project Overview:

•Developed a full-stack car rental platform for users to view, book, and manage car reservations.

Kev Features:

- Frontend: Built a responsive UI using React.js with Hooks for dynamic interaction
- Backend: Created RESTful APIs with Node.js and Express to handle car data and bookings
- Database: Integrated MongoDB for storing user, car, and reservation data
- Emails: Implemented booking confirmation emails and booking ID notifications using Nodemailer

Croma Clone – Frontend using React Link

Mar '25 — Mar '25

Jaipur, India

- Tech Stack: React.js, JavaScript, Tailwind CSS, HTML, CSS
 - Created a responsive Croma website clone using React.
 - Made reusable parts like navbar, product cards, and banners.
 - Used Tailwind CSS to style the site and make it look good on phones and computers.
 - Learned how to build a real website with React and design it nicely.
